

EE422C Project4 Team Plan

Clement Pardon cp34735

John OFarrell jro769

Fall 2016

We reviewed the entire project before starting to code. We met to decide how we would split our work. Clement did the makeCriticter and displayWorld method. John did the WorldTimeStep Method. Each one of us made his own Critter. We sat down together to write the Main class, to do the walk and run methods as well as other minor methods. Finally we met to do tests and to do any changes after the tests.
